

PRASHANTH MANNA

SENIOR DEVOPS ENGINEER | MULTI-CLOUD (AWS · AZURE · GCP) | AI AGENT DEPLOYMENT

+91 97042 87453 | prashanthmanna.ai@gmail.com | linkedin.com/in/prashanth-manna | github.com/mannaprashanth

PROFESSIONAL SUMMARY

Results-driven **Senior DevOps & Cloud Engineer** with **7+ years** of experience across enterprise data-center operations and modern multi-cloud engineering on **AWS, Microsoft Azure and Google Cloud**. Specialist in **deploying and operating AI agents in production** — containerizing, securing, scaling and monitoring agentic workloads for healthcare, life-sciences and clinical-simulation platforms (NOKI, Samaras, Socratic AI). Currently the sole owner of cloud, DevOps and release operations at **The Supper**, an Australian investment platform, and a member of its **Marketing & Strategy team**, bridging infrastructure decisions with business growth. Hands-on with Terraform, Docker, Kubernetes (GKE/EKS/AKS), GitHub Actions, Cloud Build and Bitbucket Pipelines, with strong DevSecOps, compliance-aware architecture and cost-optimization practice.

CORE COMPETENCIES

✓ AI Agent Deployment & Ops	✓ Multi-Cloud: AWS · Azure · GCP	✓ Kubernetes (GKE / EKS / AKS)
✓ Terraform & Policy-as-Code	✓ CI/CD & GitOps	✓ DevSecOps & Cloud Security
✓ Regulated / KYC Workloads	✓ Release & Incident Management	✓ Observability & SRE Practices
✓ FinOps / Cost Optimization	✓ Tech Strategy & Go-to-Market	✓ Stakeholder & Vendor Management

TECHNICAL SKILLS

AI / Agentic Ops	Production AI agent deployment, LLM API integration, Vertex AI, containerized agent runtimes on Cloud Run / GKE, agent secrets & API-key management, autoscaling, agent observability, AI-driven CI/CD automation
AWS	EC2, ECR, EKS, S3, RDS (PostgreSQL), IAM, VPC, SES, SNS (push & SMS), SSM Parameter Store & Session Manager, KMS, CloudWatch
Microsoft Azure	AKS, Virtual Machines, Azure DevOps Pipelines, Entra ID (Azure AD), Key Vault, Blob Storage, VNet, Azure Monitor
Google Cloud	Cloud Run, GKE, Compute Engine, Cloud Build, Artifact Registry, Cloud Functions, Secret Manager, IAM, VPC, Load Balancing, Cloud DNS, BigQuery, Vertex AI
Containers & IaC	Docker, Docker Compose, Kubernetes, Helm, Terraform (HCL, reusable modules), OPA / Policy-as-Code
CI/CD	GitHub Actions, Google Cloud Build, Bitbucket Pipelines, Azure DevOps, Jenkins, GitOps, Git branching & release strategy
Observability	Datadog, Prometheus, Grafana, Google Cloud Monitoring & Logging, AWS CloudWatch
Security & Compliance	IAM / RBAC, least-privilege design, secret management, SonarCloud / SonarQube, SAST, SSL/TLS, WAF (Cloudflare), KYC data handling, data-residency-aware design, awareness of UAE PDPL, ISO 27001 & SOC 2 controls
Data, OS & Scripting	PostgreSQL, MySQL, Hasura, Firebase, BigQuery · Linux, Windows Server · Bash, Python, PowerShell, YAML · Caddy, Nginx, DNS, TCP/IP, Load Balancing

PROFESSIONAL EXPERIENCE

The Supper — Cloud & DevOps Manager | Marketing & Strategy Team May 2026 – Present

Australian investment platform (KYC-verified investor onboarding, investments, SIM activation) · Full-time · Remote

- Sole owner of cloud infrastructure, DevOps and release operations across development and production — architecture, provisioning, security, cost and reliability.
- Built and deployed the production backend on **AWS** from the ground up: EC2, ECR, RDS PostgreSQL, Dockerized backend / worker / reconciler services behind a Caddy reverse proxy with automated TLS.
- Hardened security for a **regulated, KYC-driven investment platform**: least-privilege IAM roles, SSM Session Manager access (no open SSH), secrets in SSM Parameter Store (SecureString / KMS), environment configs generated at deploy time.
- Delivered customer communication infrastructure: **AWS SES** (DKIM, MAIL FROM, domain verification), **SNS** push notifications for iOS (APNs) and Android (FCM), and ACMA-compliant SMS sender registration.
- Designed CI/CD with Bitbucket Pipelines and ECR image versioning; defined branching, release and database migration (Alembic) workflows with product and engineering.
- Led production troubleshooting across application, network and third-party telco integrations, including CloudWatch-driven root-cause analysis and WAF / proxy issues.
- As part of the **Marketing & Strategy team**, translate platform capabilities into growth strategy — shaping product roadmap, launch readiness and an admin analytics dashboard tracking registrations, KYC funnel, investments and notification performance.
- Originally built The Supper's cloud and CI/CD foundation as a ThinkHat.ai client engagement before being hired full-time to lead the function.

India · Products: NOKI · Samaras · Socratic AI · The Supper

- **Primary focus: deploying AI agents to production** across three AI products — NOKI, Samaras and Socratic AI — packaging agents as containers, wiring secure model / API access, and operating them on Cloud Run and Kubernetes with monitoring and rollback.
- Designed, deployed and supported infrastructure across dev, staging and production on **GCP, AWS and Azure**, supporting four concurrent production platforms.
- Introduced an **AI DevOps agent** for Samaras that runs automatically from a main-branch commit through build, validation and deployment, reducing manual release coordination.
- Built automated CI/CD with GitHub Actions and Google Cloud Build; containerized services with Docker and managed images via Google Artifact Registry.
- Developed Terraform IaC with reusable modules; contributed to a self-service provisioning platform with Terraform Plan validation and **OPA policy checks** for governance.
- Operated Kubernetes workloads (GKE / EKS / AKS, Helm) — deployments, services, namespaces, ConfigMaps, Secrets, RBAC and ingress.
- Secured healthcare and clinical data platforms using Secret Manager, IAM, SSL/TLS and DNS controls; embedded DevSecOps with SonarCloud / SonarQube and SAST.
- Implemented observability with Datadog and Google Cloud Monitoring and led incident troubleshooting to minimize downtime.

Colruyt Group — Operational System Engineer

2019 – 2024

India · Enterprise retail group (European operations)

- Supported enterprise servers and applications in internal data-center environments, delivering consistent uptime for business-critical systems.
- Executed application deployments, server configuration and maintenance within formal ITIL-style incident and change-management processes.
- Monitored system health, analyzed logs and resolved production incidents with root-cause analysis; built the Linux, networking and operations foundation for a move into cloud engineering.

KEY PROJECTS — AI AGENTS IN PRODUCTION

NOKI — Healthcare & EHR Platform [GCP](#) · [Cloud Run](#) · [Docker](#) · [Terraform](#) · [PostgreSQL](#) · [Hasura](#) · [Datadog](#)

- Deployed and operated AI agents alongside the EHR platform; built containerized release workflows via Cloud Build and supported PostgreSQL / Hasura infrastructure.

Samaras — Clinical Trial & Life Sciences [GCP](#) · [Docker](#) · [Terraform](#) · [CI/CD](#) · [AI Agents](#)

- Deployed AI agents to production and built an AI DevOps agent automating commit-to-deployment for the platform.

Socratic AI — Clinical Simulation [GCP](#) · [Docker](#) · [Terraform](#) · [GitHub Actions](#)

- Deployed AI agents powering clinical simulations; automated releases and managed IAM, secrets, DNS and SSL/TLS.

The Supper — Investment Platform [AWS](#) · [EC2](#) · [ECR](#) · [RDS](#) · [SES](#) · [SNS](#) · [Bitbucket](#)

- End-to-end AWS build of a KYC-regulated investment backend with secure config, notifications and CI/CD.

EDUCATION, CERTIFICATIONS & RECOGNITION

- **M.Sc., Computer Science** — Bhavan's College, 2019
- Google Cloud / Vertex AI Certification · Azure Cloud Architect — Professional Development
- **Build Master of the Year** — recognized for engineering excellence and building and supporting technology platforms
- Continuous learning: Cloud Architecture, Kubernetes, Terraform, DevSecOps, Platform Engineering, Agentic AI Operations
